Sequential Lesson Plan	Target Skill:	Mu	Iultiple place settings at table										
	Teacher:												
Student:	Date:												
Behavior objective : Before meals, Functional association: Domain: D	Function: independent living skills												
Current lesson status [acquisition, fluency, maintenance]: acquisition (trials/set; # data-points collected per week): 2 data points per week													
Target Criterion (specify type of data: %, frequency, rate, duration, etc.): 70% accuracy, 2 staff, 2 locations													
				g-term cue "Set table" as indicated on students picture									
between gestures and full physical	dule												
Discrete Trial format: No		ential format: Yes											
[maximum # per set]	Chained?: Backward Chain												
One vs. Two person prompt?:			east Prompt Hierarchy - FP, PP, G										
One Parlaturi Cart	Pause interval (for hierarchy or delayed): ror Correction: Backstep if not on the target step												
	and D . (and D (1 : (1) : (2) : 1 d											
Natural or additional completion R+: natural: eats, praise			2 nd R+ (during task): praise ("Nice job setting the table.")										
Current 2 nd R+ schedule: praise, 1:2 items set out			Goal 2 nd R+ schedule: praise, 1:7 items set out										
Generalization (stimulus factors): [people, place, materials,				Generalization (response factors):[rate, accuracy,									
supervision, etc.] Vary staff, meals (e.g., breakfast, lunch), type				magnitude, duration, etc.] Vary number (maximum of									
of plates/silverware, staff proximity, location (e.g., classroom)				6) of place settings to be set, decrease time to set table									
Parametric details: All of the materials needed will be lined up on the counter. Staff will complete all of the steps of the													
task analysis except the last step. The student will be shown a picture of "set table" and then prompted to complete the target step. Use the prompt hierarchy for teaching this step. Once the student has 3 correct responses on the target step, add													
the second to the last step to the sequence. The student should complete the remaining step(s) independently.											auu		
and become to the hope to the bequence. The bradent blocked complete the remaining step(b) independently.													
Task Analysis Data Collec	tion												
Steps		Da	te:										
1. Put placemat in front of chair #1													
2. Put placemat in front of chair #2													
3. Put plate/ bowl on placemat #1 4. Put plate/ bowl on placemat #2													
5. Put napkin on placemat #1													
6. Put napkin on placemat #2													
7. Put fork on napkin #1													
8. Put fork on napkin #2													
9. Put knife to right of plate/bowl #1													
10. Put knife to right of plate/bowl #2													
11. Put spoon to right of knife #1													
12. Put spoon to right of knife #2													
13. Place cup above the plate/bowl													
14. Place cup above the plate/bowl	#2	TD 4	1
